***Allowable Subject Matter***

1. Claims 1-21 are allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: Applicant has filed a terminal disclaimer in response to the previous office action, which indicated that there was an obviousness-type double patenting issue. As indicated in the previous office action, claims 10-12 were indicated as containing allowable subject matter.

Although the prior art discloses apparatus and methods for contention resolution as associated with a radio communication system wherein communication exist between a primary station and a secondary station, whereby the secondary station request allocation of random access channel via transmission of access preamble at one of a plurality of available time offsets and transmitting an access acknowledgement indicating whether the requested resource is available, they fail to teach or suggest requesting allocation of a random access channel resource by transmission of an access preamble at one of a plurality of available time offsets and a primary station, and a time offset indicating the identity, bit rate and priority of a secondary station.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
